

We process each graft in ISO 5 (Class 100) cleanrooms using the highest level of manual craftsmanship to consistently meet our product specifications for the surgical needs of medical providers.

Sports Med Benefits

Sports Medicine allografts are an excellent replacement option for deficient or torn cruciate ligament reconstructions and revisions. Benefits of Bacterin's Sports Medicine allografts include consistent, superior quality and precise measurements. As with all of Bacterin's allografts, safety and efficacy is an absolute priority. All tendons are distributed sterile via low-dose gamma irradiation.
